Hormones naturally decrease over time for men and women resulting in sexual and other issues such as hot flashes. Holographic acupuncture presents a way to boost your hormone like symptoms to increase your quality of life

Holographic Technology
safe * drug free * fast hormone symptom relief

HORMONE SIGNAL TECHNOLOGY

8ight Holographic Technology has developed a system to signal the body by use of acupuncture points to deal with the symptoms of loss from depleted hormones in a safe natural way without the use of drugs and chemicals.

The **youthtm** disc uses thermal temperature differences outside the body and under the hologram to create an energy vortex to activate the bodies acupuncture system to deal with symptoms of hormone deficiency as described in acupuncture medicine. The temperature effect in physics is referred to as a thermal sink.

The **youthtm** hologram further captures molecular signatures of natural ingredients using frequencies of light and sound that are known to bolster the body in influencing the acupuncture system to restore energetic vitality.

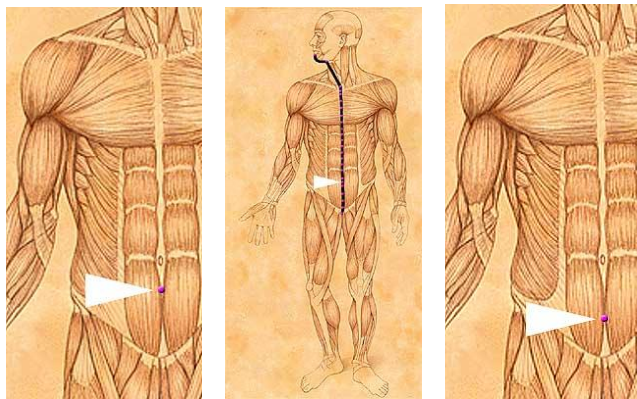

Some examples are testosterone, estrogen, progesterone, melatonin, glutathione, etc.

The **youth™** hologram also contains colors, numbers and geometric patterns that boost the energetic effect on the acupuncture points in achieving an acupuncture solution to hormone like symptoms.

Acupuncture meridians in the body influenced by hormone deficiency generally have poor energy movement, which is restored by the action of the **youth™** hologram.
